NETcell

OPTIMIZED FOR USE AS A DATA CENTER

NETcell is the tailor-made suit among apra's 19" cabinet systems. Individually configurable and easily expandable, it can be adapted to almost any requirement. For example, the combination of a basic and a bayed system enables an especially flexible, space-saving design. The system is particularly con-

vincing due to its unique, large-volume cable management system. Despite the design as an open rack, the NETcell system can be completely bulkheaded and enclosed in rows of cabinets, so that a highly efficient air conditioning is implemented.
